TALON®

SELF RETRACTING LIFELINE'S (SRL's)

Talon® Self Retracting Lifeline DBI-SALA's Talon® is engineered for reliable protection that locks when it should; won't lock when it shouldn't. The extremely lightweight design and quick-connect system gives you freedom of movement without compromising safety. Due to its small size and light weight design, Talon® can be connected directly to the back of a harness for added mobility. The Talon® can be used in place of a lanyard giving you mobility and reducing free fall distances.

Unique Braking System The Talon's® all metal braking system features an anti-ratcheting dual pawl design, with pawls functioning independently for added security. The Talon® operates on velocity not acceleration, as a result workers can maintain a normal work pace without the constant interruption of equipment lock up.

Talon® Series SRL's The Talon® series is designed to provide fall protection in a range of industries and environments. They are spring tensioned for normal work motions. If you slip or fall, the sudden jerk in the webbing activates the braking mechanisms and brings the user to a stop. They are ideal for maintenance, warehousing, utilities and construction. DBI-SALA's Talon® series SRL's are available in the following standard combinations as outlined in the specifications table.

Specifications: Talon® Self Retracting Lifeline

Part Number	Length	Snap Hook	Anchorage Connector	Weight	Lifeline
3101000	2.4m	H250	Quick connect mount handle	1.3kg	19mm wide webbing
3101001	2.4m	H250 Swivel	Quick connect mount handle	1.3kg	19mm wide webbing
3101008*	2.4m	H250	Stock Picker cab mount bracket	1.7kg	19mm wide webbing
3101050*	4.8m	H250	Swivel Mount	2.3kg	19mm wide webbing

*Also available with H250 swivel snap hook

Pawls	Cadmium plated alloy steel
Size Housing	3101000, 3101001 & 3101008; 166mm length x 100mm width x 56mm depth 3101050; 200mm length x 150mm width x 61mm depth
Drum	Glass reinforced nylon & aluminium flange on carbon steel shaft
Anchorage Connector	Cadmium plated alloy steel
Housing	Impact resistant super tough nylon
Capacity	141kg
Compatibility	Designed for use with DBI-SALA approved harnesses, components or systems or as recommended by a competent person
Maximum Arresting Distance	1.1m
Maximum Arresting Force	4kN
Standards	Exceeds OSHA, ANSI Z359.1-1991, ANSI A10.14-1991
Country of Origin	United States

		
Part Number	H250 Swivel	H250
Type	Double Action	Double Action
Opening	19mm	19mm
Material	Alloy Steel	Alloy Steel
Resistance	22kN	22kN

		
3100100 3101001	3101008	3101050

Special Instructions / Conditions of Use

Reading user instruction manual prior to use is essential

ISO 9001 - With a full quality assurance program certified under ISO 9001, DBI-SALA supplies the industry with a quality range of safety products to provide added security. That's why we back each of our fall protection and rescue systems with the best training, technical assistance and customer service in the business. It makes life easier for you and safer for your workers.
