

Evening Canoe Tour in Svartådalen – “Black River Valley”

There is something special about the long Scandinavian summer evenings. Come on an evening canoe tour in beautiful Svartådalen and you will see what we mean.

No matter what the weather has been like through the day, the evening is often still and the waters tend to get calm. The area is known for its abundant birdlife, and as you paddle your way through the typically Swedish landscape the bird's song is the only sound you are likely to hear. Your guide will assist you and no prior experience is needed. As you stop for a rest you will be served traditional Swedish coffee, boiled in a copper kettle over the open fire. Try samples of local produce and share stories around the camp fire. This tour is suitable for all ages.
